ENVIRONMENT IN FOCUS

WORK. PLAY. RECYCLE.

RECYCLING CONTAINERS • WASTE RECEPTACLES
PARK BENCHES • PICNIC TABLES • PLAYGROUNDS

The most innovative selection of green design recycling receptacles, site furnishings and playgrounds made from sustainable resources containing the maximum amount of recycled content.

CATALOG NO. 5

About us...

Since 1990 The Fibrex Group has been known for its innovative product line of green design recycling containers, waste receptacles, site furnishings and playgrounds. Our aesthetically pleasing products combine outstanding durability with affordable high-end design and performance. Fibrex products are made with sustainable resources containing the maximum amount of post consumer recycled content and require minimum maintenance.

We offer competitive factory direct pricing on our extensive line of public area recycling and waste receptacles designed for today's wide variety of recycling and litter collection needs. Recycling protects the environment, saves energy and substantially reduces the emissions of global warming causing greenhouse gases. Providing attractive and user friendly recycling receptacles in high visibility public spaces promotes good environmental stewardship while reducing waste and increasing recycling participating rates.

Our green design recycled plastic lumber site furnishings and play systems are made from 95% post consumer recycled HDPE (Milk Jugs). An average bench contains 275 reclaimed milk jugs and a moderate playground contains up to 40,000 reclaimed milk jugs. Recycled plastic lumber is the perfect alternative to traditional wood and steel products. It will never need waterproofing, painting or staining and will not rot, rust, crack, decay or splinter. Conserve landfill space, reduce your carbon footprint and go green with Fibrex.

Fibrex Group clients can expect superior designed sustainable green products backed by warranties up to 100 years. Full service turn-key installation and dependable customer service is consistently done with pride and attention to detail. Thank you for your interest in our growing company!

WORK. PLAY. RECYCLE.

Mobius

Recycling & Waste Stations

Since their introduction in 1998 the Mobius Recycling & Waste Stations have grown into one of our best selling recycling bins. They are perfect for collecting recyclables and waste in public spaces. Our recycling containers are in use in over 2,500 communities, educational institutions, corporate and small business offices all over the country. We offer low factory direct pricing and a large variety of designs, sizes and custom models to fit today's wide variety of recycling and waste collection needs. Providing attractive and user friendly recycling receptacles in high visibility public spaces promotes good environmental stewardship while reducing waste and increasing recycling participation rates. Call us today for a free design consultation and quote on the best receptacles for your recycling program.

Mobius

Designer Series

The new Mobius Designer Series combines recycling and high-end design at an affordable price. This is our most attractive unit and is perfect for use in high profile areas such as airports, office buildings, schools and universities. The innovative Mobius Designer Series comes standard with two or three compartments featuring molded drop-in openings for collecting bottles & cans, paper products and trash. Each compartment holds up to 25 gallons and is fitted with a rigid plastic liner. These new indoor recycling stations are available in an unlimited combination of colors and finishes, and are perfect for even the most discriminate of locations.

Standard drop-in openings set up:

- 5" / 12" x 3" / 8"
- 7" / 12" x 3" / 9"
- 7" / 5" / 9"
- 8" / 12" x 3"
- 5" / 7"

model	code	capacity	weight	dimensions
Two Compartment DS	DS2500	2x 25 gal.	65 lbs.	38" x 18" x 34"
Three Compartment DS	DS3750	3x 25 gal.	90 lbs.	52" x 18" x 34"

Mobius

Indoor Recycling Stations

The Mobius Indoor Recycling/Waste Receptacles are perfect for collecting recyclables and waste products inside public and commercial buildings such as offices, airports, malls, hotels and schools.

These multi-compartment waste-handling stations can be tailored to your specific collection and separation needs. Standard units are available with one, two, three or four compartments. All units are fabricated with custom size drop-in openings.

Our contemporary designs and decorative colors enhance their surroundings while promoting recycling and discouraging littering. The fiberglass Mobius receptacles are built to last and designed to leave a positive impression.

model	code	capacity	weight	dimensions
One Compartment Receptacle	ED0250	1x 25 gal.	26 lbs.	18" dia x 32"

Four Compartment Receptacle	ED4100	2x 25 & 2x 20 gal.	96 lbs.	52" x 18" x 32"

Mobius

Custom Designs

The Mobius recycling stations can be customized to a specific look that best represents your organization. We can match your government, educational or corporate image with custom colors and logos. Since we manufacture the Mobius Recycling Stations in-house we can offer very affordable custom color combinations. We will also design and apply your four-color vinyl logos. All customization is done at affordable factory direct prices. Searching for that unique appearance that sets you apart from the masses? Let us create it for you.

The Secure Vu Indoor recycling/waste receptacles comply with the Department of Homeland Security Directive SD RAILPAX-04-10 and are perfect for collecting recyclables and waste products source separated inside public and commercial buildings such as offices, airports, malls, hotels and schools. The innovative clear Lexan window panel on one or both sides of the receptacle enables maintenance or security personnel the ability to see into the container to view what users have deposited.

Mobius

Recycle Pod

Recycling meets high-end design with the new Recycle Pod. This unit is perfect for use in high profile areas such as airports, office buildings, schools and universities. The Recycle Pod is generously sized and comes standard with three compartments featuring molded drop-in openings for collecting bottles & cans, paper products and trash. Each compartment holds up to 23 gallons and is fitted with a rigid plastic liner. These new indoor recycling stations are available in an unlimited combination of colors and finishes, and are perfect for even the most discriminate of locations. The drop-in openings are set up as follows: Cans - 4" Trash - 8", Paper 2" x 12"

model	code	capacity	weight	dimensions

Recycle Pod Three Compartment Receptacle w/ Hinged Lid & Optional Locking Hasp	RP3653A	2x 23 & 1x 19 gal.	95 lbs.	51" x 20" x 37"

Profile 6

Compartment Recycling Container

The Profile 6 can be serviced without specialized collection equipment and is easily integrated into curbside collection routes. It is emptied by lifting the gas spring supported clamshell top and removing the interior bins manually. The Profile 6 is designed for use in multi-family and public area recycling programs. Popular collection locations include apartments, condominiums, universities, parks, beaches, rest stops, and military installations — virtually anywhere!

With its streamlined simplicity, the Profile 6 is a versatile, go-anywhere kind of recycling container. Its curvy lines offer a contemporary look and the six compartments can be set up to fit your custom needs. Each compartment is equipped with a heavy-duty, 32-gallon collection bin, user friendly drop-in opening, and doughnut shaped recycling decal.

model	code	capacity	weight	dimensions
Profile 6	6006	6x 32 gal.	320 lbs.	54" x 71" x 48"

The Profile 6 Compartment Recycling Container is very attractive in appearance, easy to use for all ages, and handicapped accessible. Made from quality fiberglass with a high gloss gelcoat finish, this container needs little maintenance and will perform beautifully year after year. The Profile 6 is available in a wide array of standard colors, custom shades, and options.

Profile 3

Compartment Recycling Container

The heavy-duty Profile 3 Compartment Recycling Container combines ergonomic design with automated collection methods. This recycling container holds three injection molded 95-gallon carts and will last year after year, even in the toughest environments. The Profile 3 protects the cart from weather or vandalism and provides the user with a clean, organized recycling set-up which is clearly identified as not being a trash receptacle.

The Profile 3 is made from quality fiberglass with a high gloss gelcoat finish which makes this container low in maintenance and very durable. It is available in a wide array of standard colors, custom shades and options.

The Profile 3 features three drop-in openings which can be set up and labeled to your specifications. To service this container, simply unlock the gull-wing front of the unit and it will open all the way automatically. The interior collection carts are then simply rolled out and handled accordingly.

The Profile 3 was designed for use in multi-family recycling programs, but has become very popular at many other public drop-off locations. The P3 Recycling Container is perfect for schools, universities, supermarkets, amusement parks or restaurants. The possibilities are endless.

model	code	capacity	weight	dimensions
Profile 3 Standard	6003	3x 95 gal.	350 lbs.	40" x 78" x 55"
Profile 3 Universal	6333	3x 95 gal.	420 lbs.	45" x 94" x 55"

Envirodesign

Recycled Plastic Lumber Recycling Centers

The Envirodesign Recycled Plastic Lumber Recycling Centers consist of several individual receptacles which are grouped together around a center post. They are available in a wide variety of styles, sizes and color choices combining both great aesthetic and functional benefits. The receptacles and center post are made from 95% post consumer content (milk jugs) recycled plastic lumber. The lids are made of fiberglass with a high gloss gelcoat finish and can be of beveled, tall, dome or sloped design. Recycled plastic lumber has a wood-like appearance and does not require any maintenance since it does not absorb any moisture. It will never need waterproofing, painting or staining and will never rot, rust, crack, decay, split or splinter.

The modular configuration of our recycling centers offer endless options to create public area recycling and waste collection centers that best serve the needs of your community.

Each recycling center consists of one, two, three or four receptacles that are attached to a recycled plastic lumber center post. This center post can be fitted with our standard recycling signage or your custom message and logo. All Envirodesign recycled plastic lumber receptacles are built to last and are covered by an excellent warranty.

Envirodesign

Recycled Plastic Lumber

Recycling

Receptacles

The Envirodesign Recycled Plastic Lumber Recycling Receptacles are made from 95% post consumer content recycled plastic (milk jugs) and are available with one, two, three or four compartments. We manufacture a large selection of styles, sizes and color choices designed especially for the collection of both waste and recyclables at non-residential locations.

Public area recycling receptacles permit people to practice their good recycling habits when at work or at play. Our multi-compartment receptacles allow for source-separated collection of recyclable beverage containers, recyclable paper products and residue waste products. Designed to last, resist vandalism and bad weather, these receptacles are attractive in design and perfect for high traffic areas such as parks, universities, city streets, sidewalks and many other public spaces.

Public area recycling receptacles permit people to practice their good recycling habits when at work or at play. Our multi-compartment receptacles allow for

Envirodesign

Recycled Plastic Lumber

Waste Receptacles

The Envirodesign Recycled Plastic Lumber Waste Receptacles are tailored for today's wide variety of collection and separation needs. They are made from 95% post consumer content (milk jugs) recycled plastic lumber, engineered to meet the highest quality standards and require minimum maintenance.

Our trash receptacles look great and are available in a wide variety of standard and custom sizes or designs. We currently offer waste receptacles with 15, 25, 32, 55, 65 and 95 gallon capacity, and have the capability to produce almost any custom size or configuration. Call us now to discuss the capacity, lid style, color, graphics and labeling perfect for your specific application!

Recycled plastic lumber is the environmentally friendly and economically superior alternative to traditional wood, steel and aggregate concrete products. It will never need waterproofing, painting or staining and will never rot, rust, crack, decay, split or splinter.

Envirodesign

Recycled Plastic Lumber

Specialty Receptacles

The new recycled plastic lumber recycling depots hold most standard 65 or 95 gallon wheeled refuse carts. The unit comes standard with a full size lockable door through which you can remove the interior 65 or 95 gallon roll cart. The drop-in openings can be placed on the top or side of the depot.

The Envirodesign recycled plastic lumber recycling and waste receptacles can be customized to that specific look that best represents your organization. We can match your government, educational or corporate image with custom colors and logos. Since we manufacture the Envirodesign recycled plastic lumber receptacles ourselves we can offer very affordable custom color combinations. We will also design and apply your four-color vinyl logos. All customization is done in-house at affordable prices. Searching for that unique impression that sets you apart from the masses? Call us and we'll create it for you.

EcoPod & Clear View

Recycling Systems

The Clear View Recycling System is an attractive and economical solution for public area, commercial, retail and institutional public area recycling programs. It comes in a convenient 26 gallon size, various colors and has a special clear view recycling lid. The clear recycling lid reduces contamination and promotes participation. It is clearly marked and can be fitted with rubber baffles. We offer four standard drop-in openings with imprint. Opening Options: Round - Cans, Bottles, Plastic, Glass, Brown, Clear, Green, Commingle, Metal (3.75" or 5.75") Rectangle - Newspaper, Plastic, Waste, Paper, Junk Mail, White Paper (3" x 13" or 6" x 10")

The EcoPod recycling system makes saving the environment simple and rewarding. With its sleek look, borrowing more from high-end kitchen appliances than a trashcan lineage, the EcoPod is functionally smart. There are separate areas for collecting crushed aluminum cans, glass bottles, newspapers, plastic bags and other materials. The EcoPod even incorporates a patented foot-pedal operated compressor (Ecostep system) that crushes recyclables and collects them in interior bins. The unit is neatly unobtrusive for any office, school or public

cafeteria, break room or lounge. After all, the EcoPod was a BMW Designworks project designed with the concept of building a better solution to manage recycling at home and in the office. What a cool way to make the recycling process more rewarding on a daily basis!

- 16" x 20½" x 31" high
- Built of stainless steel and plastic
- Interior bin for storing 50-60 crushed aluminum cans
- Two extra pods for holding newspapers, glass bottles, plastic bags or newspapers
- Manually operated Ecostep system which includes a child-safety feature

model	description	dimensions	capacity
B10260	Clear View Newspaper Recycling Bin	17.25"x17.25"x28"H	26 Gallons
B10261	Clear View Bottles & Cans Recycling Bin	17.25"x17.25"x28"H	26 Gallons
B10262	Clear View Waste Bin	17.25"x17.25"x28"H	26 Gallons
E12800	EcoPod Recycling Bin/Compactor	15"x16"x31"H	50/60 Cans & Bottles

Commercial Recycling Bins

The Super Sorter All-In-One is available in one, two and three compartments. It is built to be durable, long-lasting and easy to empty. With its security features, attractive design and flexibility in indoor/outdoor applications, they are an excellent solution for centralized recycling and waste collection. The Super Sorter All-In-One is now available with advertising frames. The aluminum frame is attractive and durable for both indoor and outdoor applications. Plexiglas (Lexan) inserts are optional and recommended for outdoor use. Custom signage designed for the frame system is available directly from The Fibrex Group. All Super Sorter Series products come with Super Sorter Openings to ensure high quality separation of recyclables.

Opening Options:

Round - Cans, Bottles, Plastic, Glass, Brown, Clear, Green, Commingle, Metal (3.75" or 5.75")

Rectangle - Newspaper, Plastic, Waste, Paper, Junk Mail, White Paper (3" x 13" or 6" x 10")

The Stackables recycling bins can be easily stored when not in use and are sturdy enough to be permanent fixtures. Its unique ergonomic design makes it very easy to empty. The heavy bag is not lifted out of the receptacle, but the outer casing itself. One simply lifts the outer shell and then has easy access to the full plastic liner. Tops and decals can be customized for all types of recyclables. The removable dome-shaped top is 12" high with a concave cavity, which helps to channel office papers into the drop slot in the center of the cavity. The drop slot is 12" x 2½" deep. A round 7" or 9" drop-hole is also available for collecting drink cans, bottles or cups.

The Automated Recycling Receptacle is designed for fully-automated collection at high volume locations. This design replaces the outdated manually emptied concrete and metal receptacles commonly found in public locations. Its fully automated emptying system greatly reduces manpower and collections costs.

model	description	dimensions	capacity
B10270	Super Sorter One-In-One Recycling/Waste Bin	20.5" x 15.875" x 44.5"H	30 Gallons

Recycling Carts

Front & Rear Loaders

Momentum dumpsters, recycling & security carts are the green choice for collecting recyclables, confidential documents, waste and organics. We offer competitive factory direct pricing, recycled content and custom designs. Our front and rear load

plastic commercial containers are ideal for handling a high volume of recyclables, commercial, organic or food waste. Available in 2, 3, 4, 6, 7, and 8 yard capacities, Momentum containers are up to 30% lighter than comparable metal containers and can easily handle loads from 1,000 to 5,000 pounds. All models are available with custom drop-in openings for bottles & cans, newspaper, cardboard or organics. Our high volume recycling containers are manufactured with the maximum amount of medium or high-density recycled content polyethylene. Our containers are practically maintenance free - they will not dent, rust or require painting.

Igloo

Recycling Containers

The classic Igloo Recycling Containers are true landmarks of the recycling age. More than half a million Igloos are hard at work collecting recyclables worldwide. In the United States, the Igloo Recycling Container is manufactured exclusively by The Fibrex Group. We build crane operated Igloo Recycling Containers, as well as models which are emptied manually through a full size, side-mounted door.

Igloo Recycling Containers are designed for use at drop-off sites, universities, NFL and college football stadiums, convenience centers, military installations, etc. The Igloo Recycling Container continues to be easily recognized by the public and always generates unequalled participation rates. Timeless in form and function, this classic will continue to be successful for many more years to come.

The Igloo drumcover is designed to cover a standard open top 55 gallon steel drum and turns it into a state of the art recycling or waste receptacle.

model	code	capacity	weight	dimensions
Igloo 3.5 Beverage	3581	3.5 cu. yds.	285 lbs.	67" dia x 68"

Profile

Used Oil Containers &

Used Filter Receptacles

Collecting used oil from the Do-It-Yourself oil changer is easy with the Profile Oil Containers. Conveniently located used oil drop-off sites equipped with attractive and user-friendly tanks are an essential element for any successful used oil program.

The Profile Oil Container is specially designed to accept used oil from the public. This attractive unit is very user-friendly which improves program participation and aids in keeping the collection site clean. The Profile Oil Container combines the unique feature of a steel inner tank surrounded by a rust resistant fiberglass secondary containment. Other features include a large disposal funnel, rain resistant lockable lid, level gauge, instruction decals and a 2" service coupling for pumping out the used oil.

In addition to used oil, many communities are now also looking to collect used oil filters. The Igloo drumcover, combined with a spill pan and standard open top 55 gallon steel drum, becomes an attractive and safe receptacle perfect for collecting used filters.

model	code	capacity	weight	dimensions
Profile Oil Container	6300	300 gal.	500 lbs.	71" x 52" x 61"
	6400	400 gal.	590 lbs.	71" x 52" x 61"

Recycled Plastic Lumber Benches

VICTORIAN

SHEFFIELD

ELITE

Design makes the difference. We have combined sustainable design with industrial strength to create an exclusive line of public site benches. Our quality construction will ensure many years of service even in the busiest environments. Recycled plastic lumber benches are built to last, and are available in both traditional and contemporary styling. All benches are made with recycled plastic lumber slats containing up to 95% post consumer (milk jugs) recycled content. Recycled plastic lumber has a wood-like appearance and does not require any maintenance since it does not absorb any moisture. It will never need waterproofing, painting or staining and will never rot, rust, crack, decay, split or splinter.

Green Design Park & Playground Products

The Fibrex Group offers a wide variety of recycled plastic lumber site furnishings and is an authorized distributor of Play Mart® Playgrounds recycled plastic play systems. Choose from a wide variety of standard configurations, or work with our designers to create the park or playground of your dreams. We offer complimentary 2D & 3D design and site plan services, and are happy to come visit your site for a free consultation at your convenience. We can also handle your installation and surfacing needs with ease. **Call today for your free full-color catalog.** Through Play Mart® playgrounds and fitness equipment, environmentally conscious customers can now choose a product that conserves our beautiful pine and redwood forests by using reclaimed plastic - primarily milk jugs - instead of wood. The main structure and decks of a Play Mart® playground are made from RSP - Recycled Structural Plastic™ - 100% reclaimed HDPE (High Density Polyethylene). A typical Play Mart® playground is manufactured with 85% recycled content (by weight, including metal and plastic play components) and contains an average of 25,000 milk jugs. The Fibrex Group is pleased to provide buyers with a sustainable playground option that is economically and environmentally wise for generations of children to come.
